

Comprehensive Air Control and Architectural Metal Products

Our companies serve multiple channels across North America and are proven manufacturers and suppliers. We offer our customers the best in HVAC products and expertise through four manufacturing facilities, each a center of excellence. Having locations in the Midwest, Southeast, and West allows for efficient shipping options for our products – from state-of-the-art equipment to innovative engineering, we are setting the standards for the highest quality products and industry-leading turnaround times.

We understand the fast-paced nature of our industry and the need for customization. Our engineering, sales, and manufacturing teams are focused on meeting customer needs for quality and speed while maintaining the flexibility to deliver custom specifications.

Combined, the S&P Air Control companies represent almost 200 years of industry experience. Our Core Values are shared across all of the businesses, and these principles guide us in how we take care of our customers, innovate, and look forward to the future as industry leaders.

CORE VALUES

Customer First Mindset

We provide our customers with more than just the products we manufacture. Exceptional service is what sets us apart, and our goal each day is to provide a positive customer experience — putting our customers first in every thought and every decision.

Ownership

We take pride in everything we do, from customer communications to product manufacturing. We understand that every action is a direct reflection of who we are.

Willingness to Learn

From the markets we serve to the people we work with, our business continually grows and changes. We embrace new and unfamiliar opportunities so we can best serve our customers and achieve our long-term goals.

Humility

We must stay humble while still taking pride in ourselves, our colleagues, and our company.

Problem-solving Attitude

We understand that customers are gained, lessons are learned, and relationships are forged when issues arise. As a team, we are solutions oriented — facing each challenge with a positive attitude and optimism.

S&P Air Control products are proudly made in the U.S.A.

UnitedEnertech **The Air Control Experts**

Dampers • Louvers • Life safety products

United Enertech designs, develops, and manufactures air movement and control products with excellent lead times and rush options available. Quality manufacturing, reliable timing, and a team committed to service excellence is what you can expect from United Enertech.
